

AI GxP Assurance Assessment

Before AI becomes an inspection finding.

Not a maturity score — a decision on every AI use case. Six areas where computerized-system inspections repeatedly find gaps: five long established in FDA's data-integrity expectations under 21 CFR 211.68 and Part 11, and the one now arriving — AI.

WHAT GETS ASSESSED

	AREA	THE QUESTION ANSWERED
01	Access & attribution	Can every GxP action be traced to a unique person — or do shared logins exist?
02	Audit trails	Are they on, complete, reviewed, and reconstructable?
03	Validation state	Which systems are making GxP decisions without defensible validation?
04	Record integrity	Can records be altered or backdated without a trace?
05	Backup & retention	Can data be deleted or overwritten without detection?
06	AI governance	Where is AI influencing GxP decisions — and is it controlled?

WHAT YOU RECEIVE

- **AI use-case decision matrix** — every use case gets a decision: proceed, proceed with controls, validate, or refuse.
- **Assurance scorecard** — every system scored red / amber / green against the six areas, with the evidence.
- **Gap register** — each gap rated by inspection risk and effort to close, so the sequence is obvious.
- **90-day remediation plan** — what to fix first, who owns it, and what “done” looks like.
- **Executive readout** — a deck your leadership can act on without translation.

DURATION

3 weeks

Kickoff, evidence review and interviews, readout. Roughly 4-6 hours of your team's time in total.

INVESTMENT

\$18,500

Fixed fee. No hourly billing, no scope creep, no \$400/hr surprise.

WHO THIS IS FOR

- QA Directors, CSV Leads, and IT Compliance Heads at **startup and mid-size pharma and biotech**.
- Teams deploying an **AI-enabled system** and unsure what “validating AI” actually requires.

The assessment is the starting point, not the pitch.

You keep the decisions, scorecard, and plan whether or not you ever use our platform. If remediation outgrows your team, we can run it with you — a separate conversation, after the findings.
